INDEX OF AUTHORS VOLUME 23

A

Ache, B. W. *see* Fadool, Michel and Ache 719
Adamski, R. T. *see* Kubrakiewicz, Adamski and Bilinski 903
Alexander, J. S., Patton, W. F., Yoon, M. U. and Shepro, D. Cytokeratin filament modulation in pulmonary microvessel endothelial cells by vasoactive agents and culture confluency 141
Amen, R. I., Baggen, J. M. C., Meuleman, E. A., Wijsman-Grootendorst, A., Boon, M. E., Bezemer, P. D. and Sminia, T. *Trichobilharzia ocellata*: quantification of effects on haemocytes of the pond snail *Lymnaea stagnalis* by morphometric means 665
Angulo, E. *see* Gomez, Angulo and Zubiaga 357
Arnaud, J. *see* Brunet, Cuoc, Arnaud and Mazza 733
Auber, J. *see* Cifuentes-Diaz, Rouche and Auber 801
Aumüller, G. *see* Oehmen, Aumüller, Bergmann and Seitz 377

B

Baggen, J. M. C. *see* Amen, Baggen, Meuleman, Wijsman-Grootendorst, Boon, Bezemer and Sminia 665
Baldwin, K. M. and Hakim, R. S. Growth and differentiation of the larval midgut epithelium during molting in the moth, *Manduca sexta* 411
Barbanti, E. *see* Franchini, Barbanti and Bolognani Fantin 893
Bard, F. and Franzini-Armstrong, C. Extra actin filaments at the periphery of skeletal muscle myofibrils 191
Barrutia, M. G. *see* Torroba, Barrutia and Zapata 17
Bartke, A. *see* Vergani, Mayerhofer and Bartke 607
Bay, B. H. *see* Sit, Bay and Wong 763
Beadle, D. J. *see* Gascuel, Masson and Beadle 547
Bergmann, J. S. *see* Moller, Bergmann, Evans, Weaver, Given and Blankenship 427
Bergmann, M. *see* Oehmen, Aumüller, Bergmann and Seitz 377
Bernardi, P. *see* Vitellaro-Zuccarello, De Biasi, Bernardi and Oggioni 261
Bezemer, P. D. *see* Amen, Baggen, Meuleman, Wijsman-Grootendorst, Boon, Bezemer and Sminia 665
Bilinski, S. M. *see* Kubrakiewicz, Adamski and Bilinski 903
Binder, T. *see* Bing, Binder, Pataricza, Kibira and Shankar Narayan 151
Bing, R. J., Binder, T., Pataricza, J., Kibira, S. and Shankar Narayan, K. The use of microcarrier beads in the production of endothelium-derived relaxing factor by freshly harvested endothelial cells 151
Blankenship, T. N. *see* Moller, Bergmann, Evans, Weaver, Given and Blankenship 427
Bolognani Fantin, A. M. *see* Franchini, Barbanti and Bolognani Fantin 893
Bondi, M. *see* Ferraguti, Bondi and Lanzavecchia 537
Boon, M. E. *see* Amen, Baggen, Meuleman, Wijsman-Grootendorst, Boon, Bezemer and Sminia 665
Boudou, A. *see* Saouter, Le Menn, Boudou and Ribeyre 929
Brittain, P. *see* Quantock, Meek, Brittain, Ridgway and Thonar 593
Browaeys-Poly, E. Extracellular matrix of the regeneration chamber and plasma membranes of the epidermis during leg regeneration in an insect *Carausius morosus* 41
Brunet, M., Cuoc, C., Arnaud, J. and Mazza, J. Tegumental glands in a copepod *Hemidiaptomus ingens*: structural, ultrastructural and cytochemical aspects 733

C

Cammarata, P. *see* Mia, Oakford, Cammarata and Yorio 161
Candelas, G. C. *see* Plazaola and Candelas 277
Carcupino, M. *see* Mazzini, Carcupino and Kathirithamby 199
Cavicchia, J. C. *see* Morales and Cavicchia 505
Cifuentes-Diaz, C., Rouche, A. and Auber, J. Development of muscle fibre nuclei in holometabolous insect larvae 801
Citi, S. and Kendrick-Jones, J. Localization of myosin in the cytoskeleton of brush border cells using monoclonal antibodies and confocal laser-beam scanning microscopy 789
Claeys, M. *see* Van de Velde, Coomans, Van Ranst, Kruger de W. and Claeys 881
Coomans, A. *see* Van de Velde, Coomans, Van Ranst, Kruger de W. and Claeys 881
Coote, G. *see* Gauldie, Coote, West and Mulligan 677
Coote, G. *see* Gauldie, West and Coote 489
Cowan, B. J., Foty, R. A. and Liversage, R. A. Insulin, glucagon and somatostatin localization in the pancreas of metamorphosed *Xenopus laevis* 777
Cullen, C. F. and Milner, M. J. Parameters of growth in primary cultures and cell lines established from *Drosophila* imaginal discs 29
Cuoc, C. *see* Brunet, Cuoc, Arnaud and Mazza 733

D

Dallai, R. *see* Vegni Talluri and Dallai 471
D'Andrea, M. *see* Gu, Pinheiro, Yu, D'Andrea, Muralidharan and Malik 437
Dannhorn, D. R. *see* Zanger, Dannhorn, Seitz and Peters 7
De Biasi, S. *see* Vitellaro-Zuccarello, De Biasi, Bernardi and Oggioni 261
De Cock, A. and Degheele, D. Effects of buprofezin on the ultrastructure of the third instar cuticle of the insect *Trialeurodes vaporariorum* 755
De Loof, A. *see* Meulemans and De Loof 285
Degheele, D. *see* De Cock and Degheele 755
Denefle, J.-P. *see* LeChaire and Denefle 307
Deyrup-Olsen, I. *see* Luchtel, Martin and Deyrup-Olsen 939
Di Rosa, I. *see* Secca, Vagnetti, Dolcini and Di Rosa 67

INDEX OF SUBJECTS VOLUME 23

A

Actin, F-, cytoskeletal, in larval and adult salivary glands of the fleshfly *Sarcophaga bullata* 285
Actin filaments, extra, at the periphery of skeletal muscle myofibrils 191
——, of annelid obliquely striated muscle 481
-actinin, in boar, Sertoli cell 235
Actomyosin, -ATPase and SDH activity, of eye muscles of the pike 657
Adrenal cortex, the effects of monensin on Golgi complex of 209
Alveolar cells, of golden hamster lung 67
Amphibian, short-toes axolotl mutant, structural changes in the proximal tubule of 631
—, urodele, *Pleurodeles*, fine structure and histochemistry of the ampullary organ of 17
Ampullary organ, of the urodele amphibian *Pleurodeles*, fine structure and histochemistry of 17
Annelid, earthworm, methylene blue filling of the dorsal giant fibres of 217
—, polychaete *Neanthes*, cell types differing in thick myofilament diameter in obliquely striated muscle of 481
Annelids, clitellate, ultrastructural analysis of sperm flagella in 537
Antennal lobe, of pupal honeybee, cultured, morphology and ultrastructure of 547
Anterior pituitary cells, of rat, cytochemistry of Ca-ATPase in 1
Antiport, -mediated rounding and endocytosis are enhanced by sulphate 763
Apocrine secretion, in principal cells of cat epididymis 505
Apoferritin, in the vacuolar system of insect hemocytes 367
Arachnid, spider *Leptyphantes santivincentii*, sexual dimorphism of gnathocoxal glands of 423
—, spider, stimulation of fibroin synthesis in 277
Arachnids, harvestmen, *Leiobunum*, nephrocytes of 7
ATPase, Ca^{++}-dependent, in rat anterior pituitary cells 1
Audition, in the locust 75, 271
Axoneme, flagellar, of sperm of two clitellate annelids 537

B

Basal lamina, of hamster tracheal epithelial cell cultures 427
Blood-testis barrier, in the boar, deep-etch visualization of the Sertoli cell 235
Brush border, localization of myosin in 789
Buprofezin, effects of, on the ultrastructure of the third instar cuticle of the insect *Trialeurodes vaporariorum* 755
Bursa copulatrix, of the butterfly *Calpodes ethlius*, absorption of phosphorus, through the cuticle of 247

C

Ca^{++}-dependent ATPase, in rat anterior pituitary cells of rat, cytochemistry of 1
Calcitonin, -gene related peptide, in dorsal horn of the turtle 515
Carcinoma cells, murine breast, organelle rearrangement and cell volume changes during squeezing invasion of peritoneal elastic lamina by targeted 293
Catecholamine, -containing nerve fibres in the branchial heart and cardiac ganglion of the common cuttlefish *Sepia officinalis* (Cephalopoda) 813
Cell culture, of compound eye of honeybee 525
Cell volume, changes, during squeezing invasion of peritoneal elastic lamina by targeted murine breast carcinoma cells 293
Chorion, of cherry fly *Rhagoletis cerasi* 745
Collagen, in oedematous human corneas, keratan sulphate proteoglycans of 593
Collagen fibrils, membrane-bound intracellular, and myofibroblasts of regenerating rabbit calcaneal tendons 173
Communication, cell–cell, in blood-forming system 457
Confocal laser-beam, scanning microscopy, of myosin in brush border cells 789
Corneas, human oedematous, histological, immunochemical and X-ray diffraction evidence for alteration of the stromal architecture and depletion of keratan sulphate proteoglycans in 593
Coupling, electrical, of earthworm dorsal giant fibres 217
Crustacean, copepod *Hemidiaptomus ingens*, tegumental glands in, ultrastructural and cytochemical aspects 733
—, lobster *Panulirus argus*, sustained primary culture of, olfactory receptor neurones of 719
—, *Siphonophanes grubei*, ultrastructural studies on accessory nuclei in developing oocytes of 903
Crustaceans, euryhaline and stenohaline, effects of osmotic shock on the ultrastructure of cell nuclei in 909

Cryofixation, of mucous granules of the hagfish 939
Cuticle, of the bursa copulatrix of the butterfly *Calpodes ethlius*, absorption of phosphorus through 247
—, third instar *Trialeurodes*, effects of buprofezin on 755
Cyclostome, hagfish, ultrastructure and permeability characteristics of the membranes of mucous granules of 939
Cytokeratin filament, modulation in pulmonary microvessel endothelial cells by vasoactive agents and culture confluency 141
Cytoskeleton, F-actin patterns in whole-mounted larval and adult salivary glands of the fleshfly *Sarcophaga bullata* 285
—, modulation of, and cytosolic distribution by verapamil in amphibian urinary epithelia 161
—, of brush border cells, localization of myosin in, using monoclonal antibodies and confocal laser-beam scanning microscopy 789
Cytosolic granule, distribution, and cytoskeletal organization modulated by verapamil 161

D

Dermal breaks, migratory cell pathways opened in anuran tadpole skin at climactic metamorphosis 307
Diplopods, egg envelopes in, a comparative ultrastructural study 561
Dopamine, -like neurones in supraoesophageal ganglia of cockroach 331
Dorsal horn, spinal, of the turtal *Chrysemys d'orbigny*, immunohistochemical studies on 515

E

Egg-shell, of *Drosophila melanogaster*, structural analysis of the wax layer in laid eggs 567
Eggshell, of cherry fly *Rhagoletis cerasi* 745
Elasmobranch, membrane specializations in flagellar ribbons of 223
Elastin, stromal fibers of peritoneum 293
Endocytosis, and antiport-mediated rounding are enhanced by sulphate 763
Endothelial cells, pulmonary microvessel, cytokeratin filament modulation in 141
——, the use of, microcarrier beads in the production of endothelium-derived relaxing factor by 151
Endothelin, immunoreactivity, in epithelium and fibroblasts of the human umbilical cord 437
Endothelium, of golden hamster lung, alveolar guanylate cyclase of 67
—, renal, nuclear bulging in 325
Epidermis, stratum corneum lipids of 445
Epididymis, cat, release of cytoplasmic apical protrusions from the principal cells of 505
Extracellular matrix, of the regeneration chamber and plasma membranes of the epidermis during leg regeneration in an insect *Carausius morosus* 41
Eye, divided compound, of honeybee *Apis mellifera*, functional morphology of 525

F

Fat body, of cockroach, TEM evidence for urocytes in 291
Fibroblast, of regenerating rabbit calcaneal tendons 173
Fibroblasts, of the human umbilical cord, detection of endothelin-like immunoreactivity in 437
Fibroin, synthesis, in spider, stimulation of, elicits ultrastructural modifications in secretory cells 277
Fibronectin, in anuran tadpole skin 307
Fish, elasmobranch, membrane specializations in flagellar ribbons in 223
—, teleost, effects of lead on hepatocyte ultrastructure in 893
Flagellar ribbons, of elasmobranch fish, membrane specializations in 223
Flight steering, in the locust, mesothoracic interneurones involved in 75
Follicles, insect polytrophic, somatic envelopes around 853
Freeze-fracture, of blood-testis barrier 235
——, of flagellar ribbons of elasmobranch fish 223
——, of sperm flagella in two clitellate annelids 537

G

GABA, immunoreactivity, in the nervous system of *Mytilus* 261
Gap junction, protein, tissue distribution and abundance in the adult brain in *Drosophila* 709
Gap junctions, in haemopoiesis 457
Giant fibres, earthworm, methylene blue filling of 217
Gills, and gut of *Hexagenia rigida* nymphs, in relation to contamination mechanisms 929
Glial cells, of antennal lobe of pupal honeybee *Apis mellifera* 547
——, of compound eye of honeybee 525
Glucagon, insulin, and somatostatin localization in the pancreas of metamorphosed *Xenopus laevis* 777
Gnathocoxal glands, of the spider *Leptyphantes tantivincentii*, sexual dimorphism of 423
Goblet cell, of moth midgut 917
Growth, parameters of, in primary cultures and cell lines established from imaginal discs of *Drosophila* 29
Growth hormone, human, acute effects of, on liver cells *in vitro* 607
Growth regulator, buprofezin, effects of on cuticle of *Trialeurodes* 755
Guanylate cyclase, of golden hamster lung 67
Gut, and gills of *Hexagenia rigida* nymphs, in relation to contamination mechanisms 929

H

Haemocytes, of pond snail *Lymnaea stagnalis*, effects of *Trichobilharzia ocellata* on: quantification 665
Haemolymph, in harvestmen 7
Haemopoiesis, direct cell–cell communication in 457

Hemocytes, insect, apoferritin in the vacuolar system of 367
Hepatocyte, effects of lead on ultrastructure of, in *Carassius carassius* var. *auratus* 893
Holoferritin, in insect hemocytes 367
Hydroxyecdysone, role of, in the control of follicular epithelium development and vitelline envelope formation in the mosquito 577
Hypophysectomy, in the rat, further observations of stage-specific effects seen after short-term 613

I

Imaginal discs, *Drosophila*, parameters of growth in primary cultures and cell lines established from 29
Insect, American cockroach *Periplaneta americana*, immunofluorescent localization of dopamine-like and leucine-enkephalin-like neurones in the supra-oesophageal ganglia of 331
—, butterfly *Calpodes ethlius*, absorption of phosphorus from the spermatophore through the cuticle of the bursa copulatrix of 247
—, *Carausius morosus*, extracellular matrix of the regeneration chamber and plasma membranes of the epidermis during leg regeneration in 41
—, cherry fly *Rhagoletis cerasi*, the eggshell of 745
—, cockroach, TEM evidence of urocytes in 291
—, *Drosophila*, gap junction protein tissue distribution and abundance in the adult brain of 709
—, *Drosophila*, parameters of growth in primary cultures and cell lines established from imaginal discs of 29
—, *Drosophila melanogaster*, the egg-shell of, structural analysis of the wax layer in 567
—, fleshfly *Sarcophaga bullata*, cytoskeletal F-actin patterns in whole-mounted larval and adult salivary glands of 285
—, hemocytes, apoferritin in the vacuolar system of 367
—, holometabolous, development of muscle fibre nuclei in 801
—, honeybee drone *Apis mellifera*, functional morphology of the divided compound eye of 525
—, honeybee, quantitative ultrastructural study of the antennal lobe in 341
—, locust, mesothoracic interneurones involved in flight steering in 75
—, locust, the organization of exteroceptive sensory inputs to interneurones of the flight neuropil in 271
—, male silkmoth *Antheraea polyphemus*, morphogenesis of the antennae of, the development of olfactory sensilla and the properties of hair-forming cells 821
—, mosquito, control of follicular epithelium development and vitelline envelope formation in; role of juvenile hormone and 20-hydroxyecdysone 577
—, moth *Manduca sexta*, growth and differentiation of the larval midgut epithelium during molting of 411
—, moth *Trichoplusia ni*, isolation of third, fourth and fifth instar larval midgut epithelia of 917
—, strepsipteran *Xenos moutoni*, fine structure of the spermatozoon of 199
—, structural and ultrastructural analysis of gills and gut of *Hexagenia rigida* nymphs (Ephemeroptera) in relation to contamination mechanisms 929
—, the development of branched silk gland nuclei 867
—, the somatic envelopes around the germ-line cells of polytrophic insect follicles: structural and functional aspects 853
—, *Trialeurodes vaporariorum*, effects of buprofezin on the ultrastructure of the third instar cuticle of 755
Insects, the distribution of aeriferous tracheae for the ovaries of 57
Insulin, glucagon and somatostatin localization in the pancreas of metamorphosed *Xenopus laevis* 777
Intermediate filaments, cytokeratin, modulation in pulmonary microvessel endothelial cells by vasoactive agents and culture confluency 141
——, of skeletal muscle 191
Interneurones, mesothoracic, involved in flight steering in the locust 75

J

Juvenile hormone, role of in control of follicular epithelium development, in the mosquito 577

K

Keratan sulphate, proteoglycans, of oedematous human corneas 593
Kidney, pronephric, of embryos and prolarvae of the sea lamprey *Petromyzon marinus*, ultrastructure of 393
—, proximal tubule of the short-toes axolotl mutant, structural changes in 631

L

Laminin, immunocytochemical localization of, in hamster tracheal epithelial cell cultures 427
Lateral line system, of urodele amphibian *Pleurodeles* 17
Lead, effects of, on hepatocyte ultrastructure in *Carassius carassius* var. *auratus* 893
Leucine-enkephalin, -like neurones in the supra-oesophageal ganglia of cockroach 331
Leuenkaphalin, in dorsal horn of the turtle 515
Lingual epithelium, of the frog *Rana rugosa*, fine structure of 385
Liver cells, of mice transgenic for human growth hormone, acute effects of human growth hormone on 607
Lucifer yellow, as intercellular permeability marker 471
Lung, cytokeratin filament modulation in pulmonary microvessel endothelial cells 141
Lung, golden hamster, cytochemical and biochemical observations on the alveolar guanylate cyclase of 67

Lysozyme, immunoreactive molecules, in a freshwater snail, tissue distribution and levels of natural and induced serum 317

M

Membrane permeability, antiport mediated rounding and endocytosis are enhanced by sulphate 763
Mesonephros, of short-toes axolotl mutant 631
Metamorphosis, dermal breaks: migratory cell pathways opened in anuran tadpole skin at climactic 307
Methylene blue, filling of the dorsal giant fibres of the earthworm by electrophoresis 217
Microcarrier beads, the use of, in the production of endothelium-derived relaxing factor by freshly harvested endothelial cells 151
Microfilaments, in germ-line cells of polytrophic insect follicles 853
Microtubules, axonemal, of strepsipteran spermatozoon 199
—, of flagella ribbons in elasmobranch 223
Midgut, epithelia, of moth *Trichoplusia ni*, isolation of 917
—, larval, of the moth *Manduca sexta*, growth and differentiation of the, epithelium during molting 411
Migration, dermal breaks: migratory cell pathways opened in anuran tadpole skin at climactic metamorphosis 307
—, in invasion of peritoneal elastic lamina by targeted murine breast carcinoma cells 293
Mollusc, cuttlefish *Sepia officinalis*, localization of catecholamine-containing nerve fibres in heart and cardiac ganglion of 813
—, freshwater snail, tissue distribution and levels of natural and induced serum lysozyme immunoreactive molecules in a 317
—, *Lymnaea stagnalis*, quantification of effects on haemocytes of, induced by *Trichobilharzia ocellata* 665
—, *Mytilus galloprovincialis*, distribution of serotonin-, gamma-aminobutyric acid- and substance P-like immunoreactivity in the central and peripheral nervous system of 261
—, slug *Arion subfuscus*, ultrastructural analysis of the morphology and function of the spermatheca of the pulmonate 357
Monensin, the effects of, on Golgi complex of adrenal cortex and steroidogenesis 209
Morphometry, membrane-bound intracellular collagen fibrils and myofibroblasts of regenerating rabbit calcaneal tendons 173
—, of haemocytes of the pond snail *Lymnaea stagnalis* induced by *Trichobilharzia ocellata* 665
—, of honeybee antennal lobe 341
—, of murine breast carcinoma cells 293
Mucous granules, of the hagfish, ultrastructure and permeability characteristics of 939
Muscle, eye, of pike *Esox lucius*, fiber types and their actomyosin ATPase and SDH activity 657
—, obliquely striated, of polychaete annelid *Neanthes*, cell types differing in thick myofilament diameter in 481
—, skeletal, extra actin filaments at the periphery of, myofibrils of 191
Muscle fibre, nuclei, development of, in holometabolous insect larvae 801
Myofibrils, skeletal muscle, extra actin filaments at the periphery of 191
Myofibroblasts, of regenerating rabbit calcaneal tendons, membrane-bound intracellular collagen fibrils and 173
Myofilament, thick, cell types differing in, in obliquely striated muscle of a polychaete annelid *Neanthes* 481
Myosin, localization of, in the cytoskeleton of brush border cells using monoclonal antibodies and confocal laser-beam scanning microscopy 789

N

Nematode, *Xiphinema*, ultrastructure of sperm cells in the female gonoduct of 881
Nephrocytes, of harvestmen, *Leiobunum limbatum* and *L. rotundum* 7
Nervous system, a quantitative ultrastructural study of the honeybee antennal lobe 341
——, axons in primary cultures of *Drosophila* imaginal disc cultures 29
——, central and peripheral, of *Mytilus*, distribution of serotonin-, gamma-aminobutyric acid- and substance P-like immunoreactivity in the 261
——, gap junction protein tissue distribution and abundance in the adult brain in *Drosophila* 709
——, immunofluorescent localization of dopamine-like and leucine- enkephalin-like neurones in the supraoesophageal ganglia of the American cockroach *Periplaneta americana* 331
——, immunohistochemical studies on the spinal dorsal horn of the turtle *Chrysemys d'orbigny* 515
——, localization of catecholamine-containing nerve fibres in the branchial heart and cardiac ganglion of the common cuttlefish *Sepia officinalis* (Cephalopoda) 813
——, mesothoracic interneurones involved in flight steering in the locust 75
——, methylene blue filling of the dorsal giant fibres of the earthworm by electrophoresis 217
——, sensory, ampullary organ of urodele amphibian 17
——, sustained primary culture of lobster *Panulirus argus* olfactory receptor neurones 719
——, the morphology and ultrastructure of antennal lobe cells from pupal honeybees (*Apis mellifera*) growing in culture 547
——, the organization of exteroceptive sensory inputs to interneurones of the flight neuropil in locusts 271
Neuropil, locust, the organization of exteroceptive sensory inputs to interneurones of 271
Nuclei, accessory, ultrastructural studies on, in developing oocytes of the crustacean *Siphonophanes*

grubei 903
—, branched, silk gland 867
—, in euryhaline and stenohaline crustaceans, effects of osmotic shock on 909
—, muscle fibre, development of, in holometabolous insect larvae 801
Nucleus, endothelial, bulging: morphological evidence for an intraglomerular perfusion regulating mechanism in the axolotl 325

O

Olfaction, in honeybee 341
Olfactory neurones, receptor, of lobster *Panulirus argus*, sustained primary culture of 719
Olfactory sensilla, development of, in antenna of male silkmoth *Antheraea polyphemus* 821
Oocytes, of the crustacean *Siphonophanes grubei*, accessory nuclei in developing 903
Oogenesis, in diplopods 561
—, in *Drosophila melanogaster* 567
Organelle rearrangement, and cell volume changes during squeezing invasion of peritoneal elastic lamina by targeted murine breast carcinoma cells 293
Ovaries, of insects, distribution of aeriferous tracheae for 57
Oviduct, bovine spermatozoa in, before and after ovulation: SEM study 641

P

Pancreas, endocrine, localization of insulin, somatostatin and glucagon in, in *Xenopus* 777
Papillae, lingual, fine structure of the dorsal, epithelium of the frog *Rana rugosa* 385
Perfusion, intraglomerular, regulating mechanism in the axolotl 325
Pericardial cells, nephrocytes, of harvestmen 7
Phosphorus, absorption of, from the spermatophore through the cuticle of the bursa copulatrix of the butterfly *Calpodes ethlius* 247
Pituitary, anterior, of rat, cytochemistry of Ca-ATPase in 1
Pronephric kidney, of embryos and prolarvae of the sea lamprey *Petromyzon marinus*, ultrastructure of 393
Proprioception, in the locust 75, 271
Proteoglycans, keratan sulphate, alteration of the stromal architecture and depletion of, in oedematous human corneas 593
Protozoan, *Gregarina*, evidence for intercellular cohesion in the septate junction of 471

R

Regeneration, leg, in an insect *Carausius morosus*, extracellular matrix of the regeneration chamber and plasma membranes of the epidermis during 41
Relaxing factor, endothelium-derived, the use of microcarrier beads in the production of 151
Renal tubules, membrane specializations in flagellar ribbons of elasmobranch fish 223
Reproductive system, absorption of phosphorus from the spermatophore through the cuticle of the bursa copulatrix of the butterfly *Calpodes ethlius* 247
——, control of follicular epithelium development and vitelline envelope formation in the mosquito; role of juvenile hormone and 20-hydroxyecdysone 577
——, deep-etch visualization of the Sertoli cell (blood-testis) barrier in the boar 235
——, distribution, morphology and epithelial interactions of bovine spermatozoa in the oviduct before and after ovulation: a scanning electron microscope study 641
——, distribution of sulfhydryloxidase (SOx) immunoreactivity in the testis of the axolotl (*Ambystoma mexicanum*) (Amphibia, Urodela) 377
——, egg envelopes in diplopods, a comparative ultrastructural study 561
——, fine structure of the spermatozoon of the strepsipteran *Xenos moutoni* 199
——, further observations of stage-specific effects seen after short-term hypophysectomy in the rat 613
——, release of cytoplasmic apical protrusions from the principal cells of the cat epididymis, an electron microscope study 505
——, the distribution of aeriferous tracheae for the ovaries of insects 57
——, the egg-shell of *Drosophila melanogaster*, structural analysis of the wax layer in laid eggs 567
——, the eggshell of the cherry fly *Rhagoletis cerasi* 745
——, the somatic envelopes around the germ-line cells of polytrophic insect follicles: structural and functional aspects 853
——, ultrastructural analysis of sperm flagella in two clitellates (Annelida), plasma membrane and periaxonemal area 537
——, ultrastructural analysis of the morphology and function of the spermatheca of the pulmonate slug *Arion subfuscus* 357
——, ultrastructure of sperm cells in the female gonoduct of *Xiphinema* 881
Respiratory system, cytochemical and biochemical observations on the alveolar guanylate cyclase of golden hamster lung 67
——, the distribution of aeriferous tracheae for the ovaries of insects 57
Ruthenium tetroxide, staining of stratum corneum lipids 445

S

Salivary glands, of the fleshfly *Sarcophaga bullata*, cytoskeletal F-actin patterns in whole-mounted 285
Scales, of orange roughy and smooth and spiky oreo dories, morphology and chemistry 677
—, of teleost fish *Macruronus novaezelandiae*, seasonal and environmental codes in the chemistry of 489
Sensory neurones, locust 271
Septate junction, in the protozoan *Gregarina* 471

Serotonin, immunoreactivity, in the nervous system of *Mytilus* 261
Sertoli cell, (blood-testis) barrier in the boar, deep-etch visualization of 235
Sertoli cells, in rat, after short-term hypophysectomy 613
Silk gland, nuclei, the development of branched 867
Silk secretion, spider, stimulation of fibroin synthesis 277
Somatostatin, insulin, glucagon and, localization in the pancreas of metamorphosed *Xenopus laevis* 777
Sperm, flagella, in two clitellates (Annelida) 537
Sperm cells, in the female gonoduct of *Xiphinema* 881
Spermatheca, of pulmonate slug *Arion subfuscus*, ultrastructural analysis of the morphology and function of 357
Spermatogenesis, in rat, after short-term hypophysectomy 613
Spermatozoa, bovine, distribution, morphology and epithelial interactions of, in the oviduct before and after ovulation 641
—, of pulmonate slug *Arion subfuscus* 357
Spermatozoon, of strepsipteran *Xenos moutoni*, fine structure of 199
Stem cell, of moth midgut 917
Steroidogenesis, the effects of monensin on Golgi complex of adrenal cortex and 209
Stratum corneum, lipids, avian permeability barrier function reflects mode of sequestration and organization of 445
Substance P, immunoreactivity, in the nervous system of *Mytilus* 261
——, in dorsal horn of the turtle 515
Sulfhydryloxidase, distribution of immunoreactivity of, in the testis of the axolotl 377
Syzygy, in protozoan *Gregarina* 471

T

Tegumental glands, in a copepod *Hemidiaptomus ingens*: structural, ultrastructural and cytochemical aspects 733
Teleost, hoki, *Macruronus novaezelandiae*, seasonal and environmental codes in the chemistry of the scales of 489
—, pike *Esox lucius*, eye muscles of, fiber types and their actomyosin ATPase and SDH activity 657
Teleosts, orange roughy and smooth and spiky oreo dories, scales of 677
Tendons, calcaneal, regenerating, membrane-bound intracellular collagen fibrils and myofibroblasts of 173
Testis, of the axolotl (*Ambystoma mexieanum*), distribution of sulfhydryloxidase (SOx) immunoreactivity in 377
Tissue culture, acute effects of human growth hormone on liver cells *in vitro*: a comparison with livers of mice transgenic for human growth hormone 607
——, cytokeratin filament modulation in pulmonary microvessel endothelial cells by vasoactive agents and culture confluency 141
——, immunocytochemical localization of laminin in hamster tracheal epithelial cell cultures 427
——, parameters of growth in primary cultures and cell lines established from *Drosophila* imaginal discs 29
——, sustained primary culture of lobster *Panulirus argus* olfactory receptor neurones 719
——, the morphology and ultrastructure of antennal lobe cells from pupal honeybees (*Apis mellifera*) growing in culture 547
——, the use of microcarrier beads in the production of endothelium-derived relaxing factor by freshly harvested endothelial cells 151
Tracheae, aeriferous, distribution of, for ovaries of insects 57
Tracheal epithelium, hamster, localization of laminin in cultures of 427
Trematode, *Trichobilharzia ocellata*, effects of on haemocytes of the pond snail *Lymnaea stagnalis* 665
Trichogen, cells in antenna of male silkmoth *Antheraea polyphemus* 821

U

Urinary epithelia, modulation of cytoskeletal organization and cytosolic granule distribution by verapamil in amphibian 161
Urocytes, in the cockroach fat body 291

V

Vasoactive agents, cytokeratin filament modulation in pulmonary microvessel endothelial cells by 141
——, the use of microcarrier beads in the production of endothelium-derived relaxing factor by freshly harvested endothelial cells 151
Verapamil, modulation of cytoskeletal organization and cytosolic granule distribution by 161
Vimentin, in pulmonary microvessel endothelial cells 141
Vinculin, in boar, Sertoli cell 235
Vitelline envelope, of mosquito, formation of 577
Vitellogenesis, in diplopods 561

W

Wax layer, in laid eggs, of *Drosophila* 567
